

Earth healing work

The association's activities primarily consist of creating places of power, revitalizing bodies of water and joint meditations that consolidate this work. This supports Mother Earth and, in particular, heavily polluted areas.

Taking sacred geometry into account, these activities create a «Network of Light» consisting of points of light and flowers of light. In accordance with the purpose of the association, this brings about positive changes.

History of the association

Founded in 1999. In August 2001, members of our association received a message from the Ascended Master SAINT GERMAIN to build a new light net. Thereby exact details were given, how this work should look like in accordance with the laws of creation (sacred geometry). It would have to be points of radiation for light energy, which, starting from a center point (Bichwil), would all interconnect and form an entire light field over time.

The recall of earlier messages awoke, where it was said, among other things, that it is largely dependent on us (humans), what happens on Earth, because the free will of man is respected by the higher spheres.

So the challenge for this task was joyfully accepted and immediately tackled.

Annual program

- 5 - 7 building sessions
- 3 - 4 meditations / visualizations
- Saint Niklaus evening
- general meeting

Membership

We look forward to welcoming you as a member of our association. Membership is open to anyone interested.

We would be delighted if you would simply support the association with ideas or actively participate in the construction of the lighting network.

Registration

By phone: +41 (0)71 955 95 33

By Email: info@lichtnetz.ch

or write to the following address:

Verein Lichtnetz Saint Germain
Dorfstrasse 28
CH-9248 Bichwil

On our Homepage

www.lichtnetz.ch

you will find a declaration of membership and further information.

Places of power to heal Mother Earth

LIGHT NET SAINT GERMAIN

Schematic representation of the basic structure

Project Light Net

Since 2001, the members of the association meet several times a year to further develop the Light Net. The meetings are voluntary and take place mainly in Switzerland as well as in neighboring countries.

With each Point of Light an artificially generated place of power is created.

Creation of a Point of Light

- A light point is a place of power that is created with the help of energetic products and activated with a meditation.
- The basic structure of the light network consists of so-called light flowers.
- A flower of light consists of a central radiation point around which eight further (exterior) light points are grouped.
- This creates a «Flower of Life», with an area of about 10 km².
- Further points are grouped at certain distances around the central point.
- The distances are chosen so that these points all interconnect.
- Each Point of Light increases the oscillation of the earth.

The material is financed from the association's treasury and from donations.

Donations are always welcome!
